

Design executive with 20+ years building products and teams across cybersecurity, fintech, enterprise commerce, consumer products and AI , in the US, Australia, and India. I've led a 40+ person design org at Cisco and a 30+ person Design CoE at Unisys, running 0→1 launches and platform transformations while moving strategy and execution in parallel.

Currently focused on Agentic UX — designing AI-native experiences that feel intuitive, secure, trustworthy, and genuinely useful to users. I stay close to the craft, make the case for design in language product and engineering leads care about, and build teams that bridge complex technical requirements with real human needs. I build at the intersection of design and business.

PROFESSIONAL EXPERIENCE

FOCUS AREAS

Design Director : Network & AI Security

2021- Present

CISCO

Director of Design for Cloud, Network Security, and AI Defense, leading a global team of 40+ across product design, research, design systems, content, and operations. **Leading 4 AI transformation squads** across the Network Security group

- Led design for **Cisco Firewall, Hypershield, Secure Workload, and Multicloud Defence** improving NPS across the portfolio.
- Pioneered **0→1 for 2 products**, Hypershield and AI Defence from concept to 2025 alpha launch.
- Increased adoption by 10% defining success metrics, leveraging user feedback, and driving UX improvements.
- **Mentored 5+** emerging leaders across cross-functional teams.

Head of Design : Products & Applications

2018 - 2021

UNISYS

Directed the growth and maturation of the Design and Front-End Practice for Unisys Security, Cloud, and Digital Workspace solutions, overseeing a **portfolio of 10+ applications**.

- Modernized **2 legacy products & Launched Unisys Design System**
- Expanded product lines from 4 → 7 (~16 apps) with 75%+ design reusability.
- Closed **4 strategic agency partnerships** to scale niche design skills.
- Scaled design practice 30% by hiring diverse talent across UX & front-end.
- Evangelized Unisys UI/UX at NASSCOM Design for India and GAAD
